Profile

Experienced Software Developer adept in bringing expertise in design, installation, testing and maintenance of software systems. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

Employment History

Tech Lead at GTN SPA, Udine | November 2023 — Today

Craft an ERP platform for large-scale food distribution and **build the development team from scratch.**

Main technologies and topics: SOA architecture on k8s, **Nest.js** on **Nodejs** with GRPC, HTTP and RabbitMq communication. **React** with Redux and relative plugins such as RTK,RTK Query.
Features highlight: Reliable bulk import for complex data structures, Electron application for local devices integration, Scalable frontend architecture with lazy loading behind authorization and dynamic configuration.

Architecture for On-Premise and Cloud deployment on AWS, all with IaC.
Currently working on **AI features** like text-extraction, embeddings, GenUI, Text-To-Sql, AI assistant.

In addition to the technical aspects, I handle **development roadmap planning**, turning stakeholder requests into reality.

Tech Lead at Tecma Solutions SPA, Milan | April 2020 — November 2023

Coordinate the activities of 3 development teams, 1 QA team, and 1 infrastructure team to ensure **high-quality standards, cohesion, and consistency across various applications** of the company's **SAAS** platform.

Main technologies and topics: microservices architecture on k8s, **Gitlab CI/CD, Node.js** with GraphQL and Nest.js**, React** with Redux.

Software Engineer at EBS Consulting, Padua | September 2019 — April 2020

Developed and enterprise level platform to handle charging stations system for a big company in North Italy using Java EE on JBoss and Quarkus

Massively contribute to the distributed payment system composed by various asynchronous jobs on Quartz and SQL packages.

Software Developer & Consultant at Sanmarco Informatica, Padua | June 2015 — August 2019

Crafted specialized solutions for the company's customers to match their unique workflows on top of the company's ERP.

Successfully integrated with a semi-autonomous warehouse from goods receiving to delivery through picking and packing thanks to SOAP services.

Education

Università degli Studi di Padova, Padua | January 2011 — June 2015

Attended lectures: Java, computer architecture, discrete mathematics and probability, mathematical analysis, linear algebra and geometry, physics, microelectronics.

Electronics and Telecommunications Technician, State Technical Industrial Institute E. Meucci

General telecommunications like antennas, lines, digital systems, encodings, PCM, terrestrial and satellite transmissions, electronics, automatic systems, drawing and realization of electronic schematics (PCB), C++ and Assembly programming.
